MongoDB, MySQL, PostgreSQL, Prisma, Query Optimization, Caching

Cloud & DevOps

AWS, Docker, CI/CD Pipelines, Git Version Control

WORK EXPERIENCE

Software Engineer

AlignPX Technologies

March 2019 – Present

Lahore, Pakistan

- Led a 5-member engineering team, reducing project delivery time by 25% through Agile Scrum and CI/CD pipeline implementation.
- Built **FreightDesk Online** (freightdesk.online), a distributed backend platform with service-oriented integrations across 30+ LTL freight carriers and 6+ parcel providers, auto-importing orders from 7+ e-commerce marketplaces and processing 30,000+ shipments monthly.
- Designed and maintained RESTful and SOAP-based backend services in Node.js/Express and PHP/Laravel, handling authentication, role-based access control, and real-time rate comparison across integrated carrier APIs.
- Developed and published the **FreightDesk Online Shopify App** on the Shopify App Store, eliminating 100% of manual data entry in order fulfillment and enabling real-time rate comparison across carriers.
- Established code review, automated testing, and CI/CD practices, improving code quality and release stability.
- Architected and launched **Haleria** (haleria.com), an AI-powered customer support platform handling 50,000+ automated WhatsApp conversations monthly and cutting merchant support time by 60%.
- Built and published the **Haleria Shopify App** on the Shopify App Store.

Software Engineer

Topdot Software House

August 2018 – March 2019

Lahore, Pakistan

- Improved application performance by 20% through database query optimization and caching strategies.
- Developed and maintained 4+ web applications using PHP/Laravel, serving 2,000+ daily active users.
- Reduced average bug resolution time by 35% through systematic debugging and code review processes.

PROJECTS

Haleria Shopify App – Published on the Shopify App Store
